

Versatile and rugged

Steel Roof Cap

The steel roof cap is a high capacity vent that provides effective airflow for kitchen hoods and other venting applications and is available in two sizes.

It offers rugged, durable protection with a baked enamel finish that is compatible with roof cements. A removable birdscreen allows for easy cleaning and maintenance.

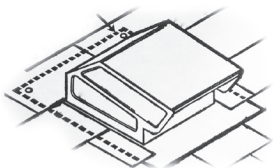

FEATURES & BENEFITS

- RVM634: Versatile range fits 3.25" x 10" ducting, and up to 8" round ducting.
- RVM636: Available in flush and 4" collared models.
- Rugged, durable 26 gauge galvanized steel with black baked enamel finish.
- Available in two sizes: 18.75" and 11"
- Built-in backdraft damper and removable bird screen.

* Not for use as dryer venting.
