

Soffit Vents

SV Series

The Primex Soffit Vent Series (SV Series) consists of low-profile, curved hood that directs airflow away from the soffit.

The UV-stabilized, one-piece design eliminates leaky seams. A one-way damper prevents rodents and debris from entering the home while effectively exhausting moisture.

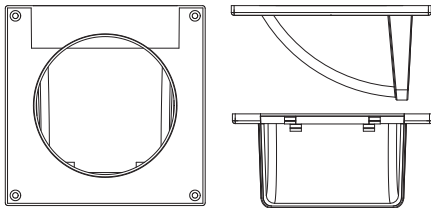

The SV Series comes in standard 4, 5 or 6-inch ducting sizes with an aesthetically-pleasing design.

FEATURES & BENEFITS

- Low profile, one-piece design is less obtrusive than traditional vents.
- Choose from three different sizes for either 4", 5" or 6" ducting.
- Can be used in new or retrofit applications.
- No need to penetrate the roof or walls.
- No leaky seams on the vent hood.
- Made from durable, UV-stabilized polymer resin.
- Lightweight and easy to install.
